Our Mission

When a business is born, its culture germinates from its founding members and first few employees. As the company grows, and the team expands, there comes a need to take a more active role in harnessing and distilling the core values that underpin this constantly self-renewing and evolving culture. It is not about prescribing feel-good values to the business or creating a meaningless slogan. It is about mutually agreeing on a common purpose and desired outcomes, from which the governance, accountability, transparency, and directions of McKinley can consistently and naturally grow and expand further, that guide and resonate with everyone who is part of our team.

Our mission is to share with clients the knowledge and experience of our team of professionals, meeting companies' demands for professionals who could advise and support the sustainable growth of their business and the development of human capital.

OUR PEOPLE

The Heart of Our Business.

Our people are our engine – the creative minds and hearts behind the ideas, coupled with the expertise behind our deep professional knowledge. We're on a journey together, guided by a common understanding of the destination, and how we want to get there. Our brand and our company have grown and evolved over the years, and every company within the McKinley Group of Companies is complemented by our people, who are immensely proud and excited to be part of it.

"As investors with an industrialist vision, we aim to generate attractive investment returns by following a patient and disciplined approach, employing high-quality people, pursuing the highest standards of excellence, and aligning our interests with our investment partners."
